Backpack Ride

Sporty notebook backpack with helmet fixation

The lightweight backpack featuring a sporty design is ideal for all those who are often on the move. Devices measuring up to 15.6″ can be securely stowed in the lockable notebook compartment. The padding made of high-density foam and the elastic hook-and-loop fastener guarantee that your device will be held securely in place without slipping. For tablets measuring up to 10″, there is another slip pocket fitted in the backpack interior. The breathable padding on the rear and the length-adjustable shoulder straps mean that the Ride backpack guarantees added wearing comfort for active users.

The backpack cuts an impressive figure with functional details that will make your life easier. You can attach your cycling helmet to the outside in a compact fashion, so there's enough space left in the generous main compartment for documents and personal items. The compression straps, attached on the left and right as well as on the underside, allow you to compress the backpack to create a space-saving solution. The slip pockets in the front compartment are ideal for storing your smartphone, pens and other small items. An additional key fob ensures that you have your keys to hand at all times. Splashes of red make the Ride backpack a real eye-catcher, while the reflective details keep you safe at night.
